Botex DMX Merge DM-2512 DMX Merger

Botex DMX Merge DM-2512 merges two DMX input into one DMX output according to different rules.

Features

- 2x DMX512 inputs XLR 3-pin
- HTP
- Functions: Merge/Add/Sub

Description

The Botex DMX Merge DM-2512 merges two DMX input into one DMX output. DMX signals are digital data streams which can not be simply added by a stacking switch. For this purpose, a converter is required which is equipped with two receivers and a transmitter. All received data is properly reassembled and emitted again.
